

Communication is always at hand!

AAC Communication Boards

Welcome to CoughDrop's platform dedicated to providing innovative alternative and augmentative communication boards tailored for public and municipal areas. Designed by experienced **alternative** and **augmentative clinicians** and **professionals**, we understand the significance of accessible tools in fostering engagement and empowerment for individuals with diverse communication needs.

CoughDrop's range of communication boards are expertly crafted to bridge gaps and facilitate seamless interaction within communities, schools, hospitals, and public spaces. With a commitment to accessibility and user-centric design, we offer solutions that promote inclusivity, independence, and equality for all.

Playgrounds

Users can communicate while they're having fun! Need a snack, a bathroom break, help or new game, they can use the communication board. It's perfect for communications between classmates, students and teachers and parents.

Schools

A communication board is a wonderful platform for school-centric communication and participation in the educational experience. Student can ask questions, ask for assistance, make requests as they grow and learn with this inclusive instrument.

Museums

As AAC communication board users explore the wonders of the museum, our CoughDrop boards become their voice, facilitating seamless interactions with exhibits and fellow visitors alike. Users will be empowered as they express their curiosity, appreciation, and excitement with our intuitive communication boards.

Aquariums

A communication board is the perfect way for non-verbal users to to enjoy the aquarium experience! They can share their requests for personal things, needs and learn about the wonders of the ocean. This interaction will make them lifelong fans of all the creatures from the deep
